

SHOWER WALL CARE & MAINTENANCE

This material is engineered to provide easy maintenance and care. Unlike traditional shower wall finishes, this material is designed to resist mold and mildew growth and does not require abrasive cleaning agents or bleach based products to maintain.

Shower wall surfaces can be cleaned using many bleach free typical household, non-abrasive cleaning agents. Normally, you will only need a damp cloth to clean the wall surface thoroughly.

Per most cleaning agent instructions, the surface must be rinsed with water immediately after cleaning and then wiped dry to avoid water spotting.

Cleaning Product Examples

- CLR Bath and Kitchen
- Comet Soft Cleanser* Bleach Free
- Kaboom Shower and Bathtub Cleaner
- Scrubbing Bubbles Bathroom Grime Fighter
- Lime-A-Way Bathroom Cleaner
- ZEP Shower Tub & Tile Cleaner

Maintenance Protocol

- Spray your walls with diluted cleaner.
- Wipe the tiles and shower walls with a damp sponge (Blue Scotch-Brite pad), DO NOT AGGRESSIVELY scrub your walls as this can dull the appearance.
- Avoid using bleach or other harsh chemicals. *Bleach can cause permanent damage.
- Thoroughly rinse shower walls with water after each cleaning and towel dry.
- Water spots may be removed using CLR Bath and Kitchen or Lime-A-Way Bathroom Cleaner. (*Apply cleaners following the manufacturer's instructions, allow cleaners to set, rinse thoroughly and dry completely).

Note

- Do not use abrasive or bleach based cleaning products. ***Bleach can cause permanent damage.**
- Do not use petroleum based solvents. Adhesive residue or pen marks are best removed using isopropyl alcohol 70%
- Lightly agitate with a blue Scotch-Brite pad or other non-abrasive pad. Do not use a green Scotch-Brite pad as this will dull the surface of the wall.
- Thoroughly rinse shower walls with water and towel dry after each cleaning.
