WHAT THE WARRANTY COVERS

LokDots Installation System – The Company, subject to the terms and conditions set forth below, warrants that the LokDots Installation System will be free from manufacturing defects and will adhere to the floor under normal usage for the time period stated in this limited warranty (“warranty”), when used in accordance with

1. The Company’s technical data sheets and other written instructions,
2. Applicable building codes and regulations and
3. Standard industry practices.

It is the sole responsibility of the installer, general contractor, architect of record or owner, as a condition of warranty coverage, to first determine the suitability and compatibility of our product of the user’s intended use. If visible moisture is present or there are known moisture issues such as hydrostatic pressure, additional steps should be taken to address the moisture issues.

WHAT CONDITIONS APPLY?

The LokDots adhesive system must be used in accordance with The Company’s published pre-installation and jobsite installation instructions. It is required that the following steps be followed prior to installation:

- All substrates must be dry and completely free of dust and dirt, paint, oil, curing or release agents, unapproved sealers or existing adhesives, or anything that would interfere with the adhesive making a good bond directly to the substrate. Refer to the substrate preparation guidelines per current CRI 104.
- Use only mechanical means to remove existing adhesives, and then finish removal by sanding, grinding, or blasting until the bare concrete surface is exposed. Do not utilize solvents or chemical cleaners on the substrate.

THE LOKDOTS ADHESIVE WARRANTY DOES NOT EXTEND TO OR COVER FAILURES RESULTING FROM THE FOLLOWING:

- Carpet installed on stairs or in areas subject to abnormal foot-traffic use (i.e. golf spikes, other spiked footwear, ski boots, and the like) is excluded.
- Damage from flooding, excessive moisture from existing moisture issues or installing LokDots over visible moisture.
- Failure to follow all pre-installation, layout, installation and application instructions.
- Uneven subfloors beyond the manufacturer’s specifications and tolerances.
- Subfloors on which liquid adhesive removers have been used.
- Unapproved subfloor materials.
- Improper material selection.
