

3 IN 1 ULTRA ADHESIVE

DESCRIPTION

3 IN 1 Ultra is a one component, 100% solids, cross-linking, MS polymer based adhesive. Formulated for interior installations of engineered hardwood products and mineral core products.

3 IN 1 Ultra can be used as a moisture control adhesive for **engineered wood products only**, when applied with the appropriate trowel that is supplied in the adhesive pail.

APPROVED SUBSTRATES

- For interior use only.
- Wood Association approved wood underlayment and subflooring. See Resilient Wood Substrate Information Sound and properly prepared concrete (on, above or below grade), metal, wood fiberglass and terrazzo.
- Concrete must be at least 45 days old prior to apply 3 IN 1 Ultra adhesive.
- Existing resilient products should be over 1 year old, secure and fully adhered with a full spread of adhesive. Remove all waxes and polishes from the existing floor before installation.

SUBSTRATE TESTING

3 IN 1 Ultra adhesive does not react to moisture and does not have moisture limits or pH limits associated with the adhesive.

3 IN 1 Ultra is approved for mineral core flooring and engineered wood flooring. Per the installation guidelines for each product, moisture testing and pH testing must be performed, product limits are listed below.

Flooring Type	RH (ASTM F2171)	CaCl (ASTM F1869)	Alkalinity
Mineral Core	90% (absent of hydrostatic pressure)	8 lbs (MVER)	5-12
Engineered Wood	75% (absent of hydrostatic pressure)	3 lbs (MVER)	5-12

For older slabs or slabs with a prior history of moisture related issues, Shaw Technical Support recommends moisture mitigation in the form of a 2-part epoxy system, such as MoistureTEK.

For newer slabs with an intact moisture retarder, initial moisture levels should recede over time.

NOTE: For engineered wood installations only, by using the 3/16" x 1/4" x 1/2" flat v notch trowel with spacers, moisture and pH testing is not required.

SUBSTRATE PREPARATION

- Substrate must be structurally sound, clean, level and dry.
- Substrate must be free of dust, dirt, oil, grease, paint, curing agents, concrete sealers, adhesives, loosely bonded toppings, loose particles and any other substance or condition that may prevent or reduce adhesion.
- Do not use over substrates containing asbestos or active cutback adhesive.
- Fill depressions or cracks with a cementitious patching / leveling compound that meet or exceed Shaw Industries maximum moisture level and pH requirements. Use of gypsum-based patching and/or leveling compounds which contain Portland or high alumina cement and meet or exceed the compressive strength of 3,000 psi are acceptable.
- For cracks and saw cuts deeper than 1", Shaw QuickFil is recommended.

- Installation site must be acclimated with HVAC in operation or the temperature must be controlled between 65-95^o F (18- 35^o C) and the ambient relative humidity controlled between 30-65% before, during and permanently after the installation.
- Do not use over chemically abated substrates.

APPLICATION INSTRUCTIONS AND SPREAD RATES FOR MINERAL CORE FLOORING

Read and follow the product specific installation guidelines for layout, design and any special instructions for installation.

- Spread adhesive using the recommended trowel.
- Spread adhesive evenly over substrate, keeping the trowel at a 45° angle to the substrate.
- Once the adhesive is spread, immediately install the floor covering into the wet adhesive.

Flooring Type	Trowel Size	Coverage
Mineral Core	1/8" x 1/8" x 1/8" U-notch	60-70 ft ² /gal

After installation of floor covering, roll floor covering with a 75 – 100 lb roller.

Cure Time	24 Hours
-----------	----------

Note: Actual jobsite coverages may vary according to substrate conditions, type of trowel used and setting practices. Trowel dimensions are width/depth/space.

APPLICATION INSTRUCTIONS AND SPREAD RATES FOR ENGINEERED WOOD FLOORING

Read and follow the product specific installation guidelines for layout, design and any special instructions for installation.

- Spread adhesive using the recommended trowel.
- Spread adhesive evenly over substrate, keeping the trowel at a 45° angle to the substrate.
- Once the adhesive is spread, immediately install the floor covering into the wet adhesive.

Flooring Type	Trowel Size	Coverage
Engineered Products 3/8" to 1/2" thick	3/16" x 1/4" x 5/16" flat v notch	50-60 ft ² /gal
Engineered products 1/4" thick	1/8" x 1/8" x 1/8" square-notch	Up to 80 ft ² /gal
For Moisture and Sound plus Wood installation applications (see note below referencing spacer wear)	3/16" x 1/4" x 1/2" flat v notch with spacers	30-35 ft ² /gal

After installation of floor covering, roll floor covering with a 75 – 100 lb roller.

Cure Time	24 Hours
-----------	----------

Note: Actual jobsite coverages may vary according to substrate conditions, type of trowel used and setting practices.

Trowel dimensions are width/depth/space.

Due to spacer wear, replace the included trowel blade for every pail of LokWorx Multi-Use 3 IN 1 Ultra adhesive.

ADHESIVE APPLICATION NOTES

- Coverage is approximate and will vary depending on porosity and roughness of the subfloor, angle at which the trowel is held, temperature of the adhesive and the subfloor, and the skill of the installer applying the adhesive.
- Coverage can be lower over subfloors not properly prepared according to established industry guidelines.

PRODUCT CHARACTERISTICS

Read and follow the product specific installation guidelines for layout, design and any special instructions for installation.

Weight	44 lbs / 4 gallon pail
Pallet Quantity	48
Pallet Weight	2,162 lbs
Polymer Type	MS Polymer
Percent Solids	100%
VOC's (Rule #1168 of California SCAQMD)	.5 g/L
Color	Off White
Shelf Life	1 years from manufacturing date, in an unopened container
Storage Conditions	50°F to 90°F (15°C to 32°C). Protect from freezing
Flash point (ASTM D56)	>212°F / 100°C
Cleaning Instructions	Use warm soapy water while adhesive is still wet.
Traffic	Light Traffic – 12 hours Heavy Traffic - 24 hours

ENVIRONMENTAL

- California South Coast Air Quality Management District Rule 1168
- California Department of Public Health Section 01350
- [CRI Green Label Plus Certified 100938](#)

LEED IEQ Credit Information (2009 and V4)

Credit Requirement	Status	Comment
Meets General Emissions Evaluation Criteria	Complies	CRI Green Label Plus (GLP) #100938
VOC's (Rule #1168 of California SCAQMD amended October 6, 2017)	Complies	VOC Content < 50 g/L

WARRANTY

This product is covered by a 1 year limited warranty and 15 Year under bed warranty when used with specific products. For more detailed information on this limited warranty, please see contact information at the bottom of this page
